SUMMARY

As a problem solver with skills and a determined mindset I am committed to meeting challenging development goals within tight timelines while producing flawless code. With over 1+ years of experience in Web development I have the expertise to deliver software solutions. Having successfully completed projects I am confident in my ability to tackle any challenges and deliver high quality results

WORK EXPERIENCE

Texas Digital Hub - Lahore

Jun 2025 - Present

- Set up the front-end architecture and codebase from scratch using React, TypeScript, and Tailwind CSS.
- Developed a scalable healthcare platform that streamlines lab operations and enables clinics, providers, and patients to manage medical records, tests, and insurance data efficiently.
- Integrated Laravel APIs for secure, real-time communication between the platform and Texas-based lab systems.
- Leading a front-end team, ensuring clean code practices, performance optimization, and a seamless user experience.

Ultraship TMS (Remote-US-Based)

Dec 2024 - Jun 2025

- Contributed to a logistics-based platform focused on managing teams, carriers, shippers, and load coordination, ensuring data visibility based on dynamic roles like partners, brokers, and team leads. Implemented key features including a calendar module for brokers to log tasks, an email campaign system for bulk outreach to carriers/shippers, and various location-based functionalities across the app.
- Played a major role in developing the Master Module for managing core entities (e.g., commodities, charge types), using Next.js, TypeScript, GraphQL, and shadcn/ui to deliver high-performance UIs.

Utecho - Faisalabad

April 2023 - Nov 2024

- Lead front-end development at Utecho, designing and implementing secure, robust features and integrating APIs.
- Collaborate with UX/UI designers and backend developers, utilizing React.js, MUI, and Ant Design. Manage code with Git, ensure quality through automated testing, and conduct comprehensive code reviews.

Xavier-tech - Faisalabad

Feb 2023 - April 2023

- Designed and developed responsive static web pages using React.
- Collaborated with the design team to translate visual concepts into functional, high-quality web pages.
- Implemented layout adjustments and cross-browser compatibility to maintain a seamless user experience

PROJECTS IN UTECHO

Dynomo (E-commerce)

- Developed 'Dynomo,' a platform where vendors can create and manage 10 types of stores, including restaurants, clothing, coffee shops, and more.
- Enabled users to add products, set dynamic pricing based on traffic percentages, and promote products with flexible discount strategies.
- Provided comprehensive store management features, including account management, product availability, and location details.

GYM Workout

- Developed a dynamic admin dashboard using React.js and Redux to display real-time data including total purchases, users, and revenue trends through interactive graphs.
- Integrated responsive UI components and a clean sidebar navigation for seamless access to Paid/Unpaid programs, Challenges, and Food management modules.
- Implemented state management with Redux to handle user interactions, program listing, and real-time chart updates, improving app performance and maintainability.

Zikr Quran

- Developed a Quran learning platform with dual roles (Student & Tutor) enabling session booking, time slot selection, and secure payments.
- Integrated Islamic features including Prayer Timings, Qibla direction, Tasbeeh, Islamic Calendar, and Names of Allah.
- Utilized Three.js for interactive 3D animations to enhance user experience.

Additional Projects (React, Next.js)

- Developed versatile front end applications with modern frameworks.

EDUCATION

Bachelor of Information Technology
Government College University | Faisalabad 2020 –2024

ADDITIONAL INFORMATION

- React Development Languages/ Tools: Git , npm/Yarn , Chrome DevTools , React ,Bootstrap/Material Design , HTML5 , CSS3 , Javascript ,Typescript
- Technologies Architectures & Pattern: State management with hooks (useState, useReducer), Component-based architecture in React, Integration with RESTful APIs, Context API, custom hooks, React hooks for side effects (useEffect), React.lazy and Suspense for performance optimization Databases: MongoDB, Firebase
- Additional Tools: Prettier , Sass/SCSS, Docker
